RAW

① Capture form has nothing related to conn. specifically.

Is reusable.

follow up is to stream same info to file

But we want to upgrade it or disable by default.

Make new Stats form primary.

② True multi-list, enable/disable lists
load/save lists

- Auto-Attp per list or global?
- Change list order (priority)
- Detect changes (mark *) or deletion (mark NEW)
- MB cache results (encryption give password)
  - invalidate cache on changes in filters
- Save current state in user prefs between restarts so even not persisted lists are surviving restart.

Traffic Control Form

Filter Mode [DENY]

| Filter Rules | Temporary rule list |

Capture

| New list | Open list | Save list | Auto-Add | Merge list |

| list 1 | list 2 |

Open Capture — UI / file — CSV / TSV / PB / etc

Filter | MATCHED / ALLOWED etc |

Include payload

| Access ~~patterns~~ stats? | Raw capture connections or packets |

+ capture to special output file, db

[V] show latest 50?

stats should do the trick?

Flip rule
